

21 September 2022

14:00 - 15:30 (CEST)

The impact of climate change on displacement and human security

Parliamentary dialogue with the UNHCR Special Advisor on Climate Action

The impacts of climate change on natural resources, livelihoods, and vulnerabilities can lead to displacement, worsening living conditions, as well as hampering the return of already displaced people. Despite their vulnerability, refugees, IDPs, and host communities have historically been severely under-served by climate adaptation support and excluded from disaster risk reduction strategies and measures.

In responding to climate change and displacement and building long-term resilience, parliaments play a central role. They ensure that treaties and commitments are translated into national legislation and that adequate budget allocations are made to support local adaptation activities and implementation of climate change and disaster laws and policies.

Join us for a webinar on **21 September**, co-organized by the UNHCR and the IPU, and supported by PHAP, in which we will discuss the **the role of parliaments and linkages between climate change, displacement, and human security**. The event will feature a presentation by the UNHCR Special Advisor on Climate Action, drawing on UNHCR's first ever Strategic Framework on Climate Action, followed by a dialogue with parliamentarians to create an open space for sharing of information and good practices.

Simultaneous interpretation will be available in **Arabic, Chinese, English, French, Russian, and Spanish**.

Event time

Wednesday, 21 Sept 2022

New York:	08:00-09:30
London:	13:00-14:30
Geneva:	14:00-15:30
Amman:	15:00-16:30
Nairobi:	15:00-16:30
Bangkok:	19:00-20:30
Manila:	20:00-21:30
