- The concept of the “Digital Workspace” or “Digital Workplace” has many definitions, which refers that it is still relatively new
- While the term itself has been in use for several years now, the idea of the “digital workspace” is still emerging
- It refers to broader issues than just a organization’s internal website
- Our target have been to build “An environment where MPs are able to quickly find what they need with consistent experiences across devices and locations.”
- The new responsive workspaces of the committees will be released in the beginning of the January 2019 for Beta use

How does it work?

Easy Access Across Devices

1. Open Device

2. Open Access

3. Connect Access

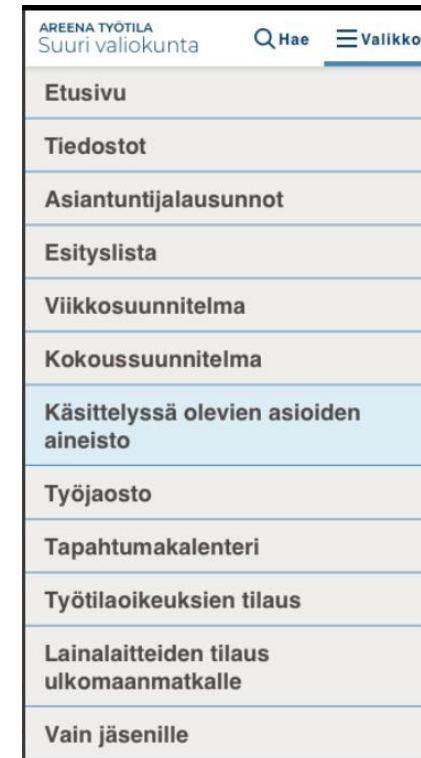

4. Access Granted

5. Choose Committee

Your are IN!

What MP can find?

World e-Parliament Conference 3. – 5.12.2018

PARLIAMENT
OF FINLAND

What for next?

- The next step will be
 - 1) to offer for MPs easy way of editing and save the information for further needs and share it with their interest groups across devices and locations.
 - The main challenge is the high security and different device features
 - 2) to offer even more allocated information
- *We haven't yet found THE concept. It is still evolving.*

Thank you!

Sari Wilenius
